The more aged
the smoother
and more complex
in flavor

MEZCAL

Can be made from
over 30 different
agave species

Unlike Tequila, which is
only ever produced in
the central highlands
of Mexico, Mezcal
is primarily made
in Oaxaca

Mezcal tends to be made
in a smaller scale with
"ancestral" techniques
such as clay pots
and reeds instead of
copper pots

For most mezcal
the piñas are roasted in
an underground pit
before it is fermented
and distilled giving it a
smokier flavor.
It is closest in flavor
to Scotch.
